SUMMARY

Computer Engineering graduate with a focus on building robust back-end systems. Experienced in server-side logic, database management, and API integrations using Firebase and SQL. Skilled in designing scalable architectures for web applications.

PROFESSIONAL SKILLS

Node.js
Jira, Postman
Firebase

TECHNICAL SKILLS

Jira, Postman
SQL
Node.js, Firebase
Cloud Functions

PROFESSIONAL EXPERIENCE

Vestel Elektronik A.Ş. | Junior QA Intern / Software Engineer **June 2023 – July 2024**

- Participated in the analysis and optimization of back-end services for enterprise-level applications.
- Actively participated in all Agile ceremonies, including Daily Stand-ups, Sprint Planning, and Retrospectives, ensuring alignment with team goals and project timelines.
- Worked within a cross-functional development team, gaining deep insight into corporate software culture and large-scale production environments.

PROJECTS

Roomifyer – Graduation Project | Feb 2026

- Developed a vectorial decision support algorithm for roommate matching
- Designed the relational database schema to handle complex user preferences

EDUCATION

Ege University | B.Sc. in Computer Engineering
2.85

Feb-2026

ADDITIONAL INFORMATION

- Active Student Member of IEEE Ege University
